

A judge annuls the building license for 22 houses in Zurgena

As reported in IDEAL 13th May 2008

In a case brought by the Junta de Andalucía against Zurgena Council the judge has revoked the building license given to Antonio López of 'Construcciones Antonio de la Jacinta' for the construction of 22 houses in 'El Palacés' in Zurgena.

In summary, the Council granted the license via council plenum in July 2006 and advised the Junta in January 2007 that the project had been greenlighted. The Junta objected in February 2007. The judge accepted the Junta's assertion that they had objected within the required time period (one month) from the time they were aware of the development. The case is under appeal.
